LAB: The Difference Between the Roman and the Greek Civilizations

The 15th of April class 5 did a laboratory with Antonio and Daniela, experts of history from the museum of natural history in Crocetta. They spoke about the differences between the Roman and the Greek civilizations, to develop our knowledge of this topic. They showed us a power point full of images of this.

It was a very interesting lesson. Then Daniela showed a game of the Romans. The name is DUPLOM MOLENDINUM. We made it with pongo and card. The scope of the game is like “power 4”.

They did it because we are studying it with teacher Sara.

We liked it so much and even teacher Sara did.

CLASS 3 LAB – CLIL -- WATER

In april 2021 class 3 did a laboratory regarding water. They talked about:
water and how to save it.

How not to waste water.

They also talked about ways of not polluting water.

They did this lab in clil lessons over 3 weeks. They also did a poster with pictures about how to save water, for example use a small flush on the toilet, repair dripping taps, use a dishwasher (energy star) and they wrote water in many languages. They liked doing this laboratory so much and creating the poster.

Class 4 Laboratory - ANCIENT CIVILISATIONS

On the 9th of April 2021 C4 with teacher Maria Luisa and the experts Daniela and Giulia from the museum of natural history in Crocetta did a lab about The ancient civilisations: Sumerians, Babilonians, etc... In their class. They saw some pictures on the computer about the remains we can see today of the civilisations that they studied. Then they did a craft lab with clay tablets where they wrote sentences in Paleo Veneto. They thought that the lab was specific and fantastic. They liked the lab very much!!!
