

Hello readers!

Here's class 5 again with another fantastic series of articles to keep you up to date with just a few of the activities the children get up to here at the primary school.

Enjoy the read.

The Chess Project

For eight Thursdays, class: 3, 4 and 5 learned to play chess.

Our teacher Andrea inspired us to play this game. Andrea used a simple method of learning. The first lesson explained how the pieces move on the board.

And the Ukrainian girls learned too. They like it a lot, first they didn't know how to play, but when they saw how to play they learned. When the course finished before the Christmas vacation, we were sad. Some pupils didn't like it but we did!

Thank you for the attention.

The Christmas Vigil- 2022

We performed the Christmas vigil at our primary school on Tuesday 13th of December. In this Christmas vigil we sang a lot of songs about Christmas. This vigil was in the theatre of the school. We did this Christmas vigil because it is a tradition of our school. Every class sang a different song. This vigil was very beautiful because we also read and performed an animated nativity story. It was also exciting for everyone, parents included. At the end we sang a song together with all the classes of the primary school. The name of the final song was Merry, Merry Christmas.

WORLD CHILDREN'S DAY

On November 20th, 2022 it was World Children's Day. Classes 3, 4 and 5 started a new project about children's rights. Every class made a little piece of a big poster. Everyone wrote a right or drew a picture. Here are some of the rights the children wrote:

Life: the right to be alive and to have a healthy life.

Food and Clean Water: the right to have good nutrition and good water to drink.

Religion: the children have the right to profess their own religion.

Play: the right to have time to play.

You can see the poster in the picture.

Our school, La Salle International Campus decided to do this project to explain that children's rights in the world are very important and must be respected.

We liked this project because it's very interesting.

Mattia, Lavinia, Daria, Enrico and Diego

UPDATE: GREEN TEAM

The update of the **Green Team** is a very important thing for the school and the environment, because we can see our progress: the pupils of the school leave less rubbish, and live together in a more respectful way. The director substituted the bins outside from one to tree bins: plastic, paper and non - recyclable (the organic bins are in class). **The Green Team** has two members for each class. They change members every week. **The Green Team** intervenes when they see people who don't recycle their waste or put it in the correct bin. They also check if lights and projectors are switched off. **The Green Team** is recognised by their pectoral, a vest with **the green team** logo. **The Green Team** is a fantastic idea.
